AI Agent Workflow (LangGraph Orchestration)

Intake Agent
Understand incoming alert/incident and extract context

Log Analysis Agent
Analyze logs, patterns and anomalies

Root Cause Agent
Identify probable root causes with confidence score

Remediation Agent
Generate step-by-step remediation recommendations

Runbook Agent
Create / update operational runbooks

Context & Memory Layer

Conversation Memory | Incident History | Knowledge Base | Runbooks | Best Practices

Decision & Orchestration Engine

Prioritization | Routing | Policy Evaluation | Escalation Logic

Data & Model Layer

Vector Database
(Embeddings)

Time Series DB
(Metrics)

Document Store
(Runbooks, KB)

Relational DB
(Incidents, Users)

Model Registry
(LLMs & Embeddings)

Observability & Governance

Monitoring & Health

Tracing & Logging

Audit Logs

Access Control (RBAC)

Security & Compliance

Integrations / Actions

Slack Notifications
Send actionable alerts & updates

Jira Integration
Create / Update issues automatically

Email / Teams
Notify stakeholders

Runbook Store
Store & version runbooks

Knowledge Base
Centralized learnings & resolutions

Web Dashboard
Incidents, Insights, Agents, Analytics
